RE: Application Serial No.: 09/892,864

Applicants: Keiichi YOKOYAMA, et al.

Filing Date: June 28, 2001

For: PROCESS FOR PRODUCING

TRANSGLUTAMINASE

Group Art Unit: 1652

Examiner: PATTERSON, C.

SIR:

Attached hereto for filing are the following papers:

Letter to Commissioner,

English translation of the International Preliminary Examination Report

Our check in the amount of -0- is attached covering any required fees. In the event any variance exists between the amount enclosed and the Patent Office charges for filing the above-noted documents, including any fees required under 37 C.F.R 1.136 for any necessary Extension of Time to make the filing of the attached documents timely, please charge or credit the difference to our Deposit Account No. 15-0030. Further, if these papers are not considered timely filed, then a petition is hereby made under 37 C.F.R. 1.136 for the necessary extension of time. A duplicate copy of this sheet is enclosed.

Respectfully submitted,

Biosic. Biotechnol. Biochem. (1997), Vol. 61, No. 5, pages 830-835, Kawai M. et al., "High-level expression of the chemically synthesized gene for microbial transglutaminase from streptoverticillium in Escherichia coli"

Katsuhide Aburatani et al., "Applied Chemistry Lecture 11 "Protein Engineering (in Japanese)," K.K. Asakura Shoten, (20.11.91), pages 52-54, pages 60-64

1. The subject matters of claims 1-10 appear to involve an inventive step in view of documents 1 and 2 cited in the ISR. Documents 1 and 2 do not describe that a denatured enzyme is processed to form an intermediate structure having enzymatic activity in an aqueous medium in an acidic region, and further to form a high-order structure having enzymatic activity in an aqueous medium in a neutral pH region. Furthermore, a person skilled in the art could not have easily conceived of this constitution from documents 1 and 2.
